

NEW UV CURING Pad Printing System

UV-curing pad printing ink

printcolor 
high performance inks

NEW SERIES 747 combines the high gloss, application stability and fast curing time of UV-curing inks with extremely high print durability. Printcolor 747 UV-curing pad printing ink is designed for decorative and functional printing such as advertising products, cosmetics, tools and toys as well as technical applications such as automobile parts. Series 747 has been well received in printrooms around the world for its easy handling and versatility, giving pad printers the flexibility and convenience that comes with a 'print-and-pack' ink system.

TECHNIGRAF
