

Solvent Wash-Up Unit

Fully enclosed pneumatic solvent wash-up unit for printer parts.

Design

- Fully pneumatic pump especially designed for safe circulation of solvents with foot control on/off
- Static discharge protected
- Safety interlock switch to cut solvent circulation when lid is open
- Anti splash lid design with full fume seal, gas struts and large glass window for easy use
- Heavy duty wash brush with teflon feed lines
- Removable internal drain shelf
- Stainless steel construction with height adjustable feet
- 750mm x 530mm internal wash bay (custom sizes also available)

Safety

- Protect yourself and your staff from exposure to solvent fumes and splashes when washing up
- Closed unit minimises evaporation of wash-up solvent when not in use

Value

- Cut clean-up time in half!
- Re-circulation of wash-up solvent reduces waste and evaporation so you get more wash-up from every drum of SolaWash
- Separate gloves and gauntlets mean you don't have to replace full length gloves each time
- Australian made.

Solva-WashUp units are supplied complete with everything you need Just add solvent!

Protection from fumes and splashes Cuts clean-up time in half.

Units may vary from those shown as design improvements are always being made!
